Highest Quality Surgical Instruments
Since 1921

Dear Customer,

Since 1921, Scanlan International has been dedicated to working closely with surgeons to provide the highest quality, innovative surgical instruments.

Over the years, the specialties of cardiac, thoracic and vascular surgery are continuing to evolve from a conventional open approach to a minimally invasive surgical approach. This evolution to minimally invasive surgery (MIS) has been the catalyst for the next generation of specialty surgical instrumentation.

Scanlan continues to be a leader in the design and development of MIS specialty instrumentation. The new Scanturian® minimally invasive surgical instruments are individually hand-crafted to assure a superior degree of instrument quality, control and detail you expect in your Scanlan instruments.

Thank you for your continued support and demand for the finest surgical instrumentation. If we can ever be of assistance to you, please contact us.

Sincerely,

Timothy M. Scanlan
President and Chief Executive Officer

Russell T. Scanlan
Chief Operating Officer

SCANLAN® Scanturian® Minimally Invasive Surgical Instruments

ScanShield® Shaft Feature

The ScanShield® shaft feature surrounds the hinge mechanisms to avoid suture entrapment and intraoperative trauma to valve tissue and chordae tendineae

Tapered Shaft

The tapered shaft design allows for more robust moving mechanisms and efficient cleaning due to the increased shaft diameter at the distal tip

Scanturian® MIS Scissors with SUPER CUT™ Blades

A unique blade design - combining a razor edge with a scissors edge, these scissors produce a clean, forward cut, eliminating pinching or slipping of tissue

Instrument Identification

Color-coded and etching for easy intraoperative instrument identification

FORCEPS

NEEDLE HOLDERS

NEEDLE HOLDERS

SCISSORS

Handle Knurling

Proven handle knurling design provides comfortable, secure grip and ergonomic handle design

Titanium Handle

Well-balanced, durable and handcrafted MIS Instrument design

Proximal End Cleaning Port

Luer lock flush port system allows for reliable automated and intraoperative instrument flushing

ScanShield® Patent no. 11,478,265

SCANLAN®

Scanturian® MIS Forceps

Scanturian® MIS Forceps

- DeBakey and Resano Jaws
- Well-balanced instrument
- High-quality and durable
- Securely grasps tissue
- Unique feature – SCANLAN® ScanShield® shaft

ScanShield® Patent no. 11,478,265
